CHALLENGES OF THE CURRENT PROCESS.

Last-mile delivery till now, is done the traditional way by a lot of people in logistics business.
To receive an order phone calls have to be made back and forth. If there are questions, series of other calls, text messages etc, is made. Burdensome business processes.
When calls are made or orders are received, the record is taken down in note books or even on pieces of paper.

Continued..
Inaccurate accounting and record keeping methods.
Un-optimized funds. Large budgets in operation.
Lots of man hour is needed in manual process. Business growth and speed is limited by human productivity.
